

HCBS Settings Final Rule Public Comment Sessions

June 14-17, 2016

Susan Fout, HCBS Director

Final Rule

- From Centers For Medicare and Medicaid Services (CMS)
- Applies to Medicaid Program Waivers
- Sets requirements for all Home and Community Based Service (HCBS) Settings
- A setting is where a person receives their HCBS services

Background

- Moves toward defining HCBS services by the nature and quality of individuals' experience.
- To enhance the quality of HCBS and provide additional protections, and to ensure full access to the benefits of community.

Requirements

- Focus on the quality of the individuals' experiences
- The intent is to protect individual choice and promote community access (access) for people receiving HCBS services
- Transition to meet requirements has to be complete by March 2019

Requirements

- All HCBS settings must have the following qualities:
 - The setting is integrated in and supports full access to the greater community.
 - Is selected by the individual
 - Ensures individual rights of privacy, dignity and respect, and freedom from coercion and restraint.
 - Optimizes autonomy and independence in making life choices; and facilitates choice regarding services and who provides them.

Provider Owned or Controlled

- A lease or rental agreement
- The individual controls his/her own schedule including access to food anytime;
- The individual can have visitors at any time;
- The setting is physically accessible
- Any modifications to these additional requirements for provider-owned HCBS settings must be supported by a specific assessed need and justified in the personcentered service plan.

Kansas Transition Plan

- The plan was submitted but has not been accepted by CMS.
- Kansas will be submitting an amended transition plan.
- The transition plan spoke to surveys sent to HCBS providers.
- On site reviews to be completed by July 31.

What We've Done So Far

- Reviewed state regulations against the rule requirements
- Developed list of HCBS providers so we can assess their settings
- Added setting and person centered planning requirements to the quality review process for HCBS services to monitor and assure compliance.

Where We Are- Assessing Our Settings

- Two provider surveys have been completed.
- Completing results to tell us what settings are compliant, partially compliant, requesting heightened scrutiny
- Depending on the number in each group will determine how the on-site visits will be completed.
- A consumer/family survey to be completed.

Next Steps

- Decide where on-site visits will be completed.
- On-site visits to be completed by July 31, 2016.
- Notification to providers of their compliance status.
- Meet with providers to determine a plan and timeline for them to transition to meet Final Rule requirements

Next Steps

- The state will request timeline for provider changes to meet Final Rule requirements.
- The state will monitor progress.
- The transition plan will incorporate the timelines for these changes as well as any provider who will not meet Final Rule requirements
- A plan for moving people in not able to meet Final Rule requirements

Monitoring Progress

- The state must monitor for each milestone in the plan for state-level actions to assure the milestone is being met.
- If a milestone is not being met, take steps to address
- If a milestone is delayed the state notifies CMS.

Monitoring Progress

- The state is responsible to make sure that providers are making changes to meet the Final Rule requirements.
- Once providers make these changes, the state must continue monitoring and oversight activities to make sure settings still meet the requirements

What If My Settings Meet All Of The Requirements?

- GREAT! You don't have to make any changes to your services, settings, or policies!
- We will review some settings believed to comply for validation

What if my setting doesn't meet the requirements?

- In some cases providers will make changes to meet the requirements of the Final Rule
- In other cases the state and providers will work together to show CMS that a setting is community based. This is called Heightened Scrutiny
 - This may include, campus settings, services attached to an institution or nursing home, sheltered workshops
- Some settings won't be able to meet the requirements and people in those settings will have to transition to other settings

Comments, Ideas, Concerns

 Kansas needs your help for our transition plan and to assure we meet the intent of the rule.

Questions of Understanding

- What did I hear?
- What is my reaction?
- What questions of understanding do I have?

Questions for You

When you think about these changes as a provider what are your hopes and greatest concerns?

OR

When you think about these changes as a participant(consumer) what are your hopes and greatest concerns?
